DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 31-33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter that was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. These claims call for a valve in the internal passage. Applicant only has ports that are uncovered by a sliding valve. There is no valve in the internal passageway that is opened by insertion.

Allowable Subject Matter

Claims 34-41 are allowed.

Response to Arguments

Applicant's arguments filed 6/4/03 have been fully considered but they are not persuasive. Applicant argues that the sliding valve used by applicant has to slide somewhere. The sliding valve is caused to be inserted within the internal passage and thus by uncovering the at least one port, the internal passageway is opened. While the internal passage is opened when the ports are uncovered, the sliding sleeve 26 is clearly outside the internal passage and no valve is present in the internal passage.

In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
